

The Hydrocephalus Association requests applications for:

## 2018 INNOVATOR AWARDS

### Innovator Award Research Focus:

**Goal:** To provide seed funding for bold and innovative research with the potential to transform the field of hydrocephalus.

**Project Focus:** Identifying new mechanisms responsible for the development of hydrocephalus; Identifying or testing new therapeutic targets; and Preclinical or clinical testing of new drug therapies and other treatments.

Emphasis will be placed on innovation and potential impact of the project on hydrocephalus research and clinical outcomes. Investigators studying **any etiology** of hydrocephalus are invited to submit a letter of intent (LOI).

### ***This award will support research in the following areas:***

- hydrocephalus pathogenesis; (e.g. cellular, molecular, signaling, developmental, and genetic mechanisms)
- drug target identification and testing;
- preclinical drug development and testing;
- preclinical medical device testing;
- clinical treatment innovation, including new medical device testing\*

\*All applicants intending to include human subjects must indicate this in the LOI and will be contacted to determine if the project falls within the scope of this RFA.

### ***This award will not support:***

- incremental progress of an established research program;
- minor modifications to current treatment approaches;
- development of new animal, *in vivo*, or *in vitro* models; (See NIH [PA-18-623](#) for funding opportunities in this area)
- behavioral or cognitive interventions;
- imaging studies (intervention studies using imaging as an outcome measure are allowed);
- development or testing of intracranial pressure monitors;
- development or modification of tools to advance hydrocephalus research; (See NIH [PA-18-623](#) for funding opportunities in this area)
- business plan development

### Award Details:

#### ***This award provides short term seed funding.***

- The award provides funding for up to 12 months.
- The project must be completed within the 12 month timeline.
- Proposals must be submitted for actual costs at one of two funding levels, \$25,000 or \$50,000.
- Total funding for this award mechanism is expected to be \$150,000.
- Preliminary data is not required.

The number of awards made will depend on the quality of the applications received and the research priorities determined by the Hydrocephalus Association. The Hydrocephalus Association will accept applications from researchers based at accredited non-profit research and academic institutions throughout the world. The award provides no institutional overhead. All applications must be submitted in English. In upcoming years, the Hydrocephalus Association anticipates a follow-on RFA for multiyear support.

**Eligibility Criteria:**

***To be eligible, candidates must:***

- have a publication record containing articles that are innovative and high impact;
- have demonstrated the ability to independently supervise staff and research;
- have completed one or more of the following degrees: MD, PhD, DSc, DO, Pharm.D, or equivalent;
- hold a research associate, assistant professorship, associate professorship, professorship, or any equivalent academic or non-academic position;
- be members of the HA Network for Discovery Science. To create an account, please visit: <http://hands.hydroassoc.org/>.

**All applicants must submit an LOI. LOIs must be submitted to [research-loi@hydroassoc.org](mailto:research-loi@hydroassoc.org) before 5:00 PM (Eastern) on June 7, 2018. LOI decisions and invitations to submit full proposals will be made in mid-June.**

**Application Details:**

***The Letter of Intent (LOI) components include:***

[Click here for the LOI](#)

- A one-page summary of the project\*
- Identification of the supporting institution
- Identification of three potential reviewers

\*All applicants that intend to include human subjects will be contacted to determine if the project falls within the scope of the RFA.

***The Full Application components include:***

[Click here for the Full Application](#)

- Contact details and other relevant administrative information (Face Page)
- Proposal Budget (Budget)
- Biographical sketches are required for the Applicant, Co-Investigator (if applicable), and Key Personnel. Biographical Sketches should not exceed five (5) pages (BioSketch)
- A research plan for the proposed project, of not more than six (6) pages, that contains a summary, specific aims and hypotheses, background and significance, research design and methods, and next steps (5 pages) and literature cited (1 page) (Research Plan)
- A description of the institutional facilities and any consultations/collaborations if applicable (Facilities and Collaborations)
- Applications from [all candidates](#) should also include a letter from the appropriate administrative institutional official confirming the institution's commitment to the responsible conduct of research, the candidate's eligibility and good standing, and that, if selected, the candidate would be able to accept the award.

All applicants must provide assurance of compliance with local research regulatory bodies and with local laws in advance of the start of research activities. Additionally, for applications using human embryonic stem cells or human tissue, the candidate must obtain appropriate Embryonic Stem Cell Research Oversight Committee (ESCR) and human subjects research approvals in advance of the start of research activities.

**Full applications are due before 5:00 PM (Eastern) on August 15, 2018. Grant finalists will be contacted in October 2018. For additional information, please contact Jenna Koschnitzky, PhD at [research@hydroassoc.org](mailto:research@hydroassoc.org) or 240.483.4540.**
